Algorithm 1

Just a sample algorithmn

Algorithm 1: first algorithm

Result: Write here the result
Input : Write here the input
Output: Write here the output

1 **while** *While condition* **do**
2   instructions
3   **if** *condition* **then**
4   instructions1
5   instructions2
6   **else**
7   instructions3
8   **end**
9 **end**

---

helo Algorithm 1

mdexecutor

hello world

package

```
vsce package
```

install package

```
\begin{algorithmic}
\STATE \textbf{Input:} $x$
\STATE \textbf{Output:} $y$
\STATE $y \leftarrow x + 1$
\STATE \textbf{Return} $y$
\end{algorithmic}

## git operation
```bash
#jobname gitupload
cd /Users/hongy0a/Documents/CodeOnMac/mdexecutor && \
git add . && git commit -m "remove warning" && git push && \
cd -
```
